Introduction to ROI Training

Co-founded in 2002 by two training industry leaders with over 30 years experience, **ROI Training** is a small business entity specializing in the onsite delivery of Management and Technology training classes. ROI is committed to offering excellence in IT and Management education while enhancing professional productivity. Unique areas of strength for ROI Training include:

- **Training philosophy.** We believe ROI has a unique philosophy among IT & management training providers: our focus is on providing first-class customer service to fewer customers allowing us to deliver training programs that are flexible, timely, & appropriate to the current issues affecting your enterprise.
- **Tailored Course Content.** ROI is committed to delivering programs that are tailored to the needs of your organization. ROI can design unique exercises and role plays based on your organizations' standards and processes so your staff gains practical experience.
- **Expert Instructors.** Our world-class instructors are industry recognized technologists and consultants, who are leaders in their respective fields as well as extremely effective trainers. ROI instructors are hand-selected from across the globe to bring an unprecedented level of experience and knowledge into the classroom.
- **Comprehensive Curriculum.** ROI offers a comprehensive curriculum of more than 120 course titles. Our library includes cutting-edge Leadership and Management, Business Analysis, Project Management, Software Engineering, Java, .NET, UNIX, Linux, Solaris, Windows Server 2008, Oracle, Scripting Languages and Security programs. A complete list can be viewed on our website at www.trainingbyROI.com.
- **Flexible Delivery Capabilities.** ROI courses can be delivered anywhere in the world. Classes are delivered on your preferred dates & times and ROI will manage all the logistical arrangements. ROI will deliver courses using your existing training lab and also has the expertise & resources necessary to provide a "traveling classroom".
